

INTRODUCING
WORLD CENTRIC
PizzaRound™

PizzaRound™

The pizza box comes full circle

Introducing the PizzaRound™ from World Centric

The new PizzaRound is the first 100% tree-free, plant-based, compostable pizza container from World Centric. The breakthrough circular container reduces packaging waste, labor and space needs as well as grease and sogginess that are common with traditional cardboard pizza boxes.

Made from 80% sugarcane and 20% bamboo – both renewable resources – the PizzaRound offers key sustainability advantages that support restaurants' efforts to minimize their environmental impact.

Secure-fit top doesn't pop open and holds in freshness longer

Removable top for easy serving and seconds as a dish

"Fresh Crust" dimples raise crust for crispness

No need for liners or tents to support lid from touching pizza

Channels wick away grease and act as cutting guides for "perfect portioning"

Circular vents let out the right amount of moisture

PizzaRound retains heat better than conventional boxes

Ovenable to 450°F for re-heating at home

Cardboard pizza boxes:

Made from tree fiber which is less sustainable than repurposed plant fiber resources

Inefficient delivery system collects grease and moisture; steam venting on sides makes pizza soggy

Folding and storing boxes, plus added liners, tissues and tent adds to operations expenses and affects bottom line

Food residue contaminates box, making it unacceptable to most recyclers

- Made from renewable resources
- Non-polluting, non-toxic and environmentally responsible
- All products are compostable in a commercial composting facility.

Why Use Our Products?

Sustainable Materials

Made from annually renewable plants like wheat, sugarcane, silver grass and corn instead of non-renewable petroleum (plastics and Styrofoam). Sugarcane fiber and wheat straw products are the most sustainable as they are made from discarded agricultural by-products.

Reduce Waste

Plastic and Styrofoam are derived from petroleum and create pollution and toxicity during production, use and disposal. Compostables come from plants. They are non-toxic, non-polluting, and reduce waste going into landfills. They biodegrade in a commercial composting system and produce nutrient-rich soil in 3-4 months, while plastics and Styrofoam persist for hundreds of years in the environment.

Use Less Energy

Our products require less energy to produce than petroleum-based products and reduce greenhouse emissions, lessening the impact of global warming.

Our Eco-Profile Analysis

This eco-profile analysis measures the energy and other inputs required to make a product, from the extraction or harvesting of raw materials to the finished product at the factory gate.

Responsible from Start to Finish

Conform to ASTM D-6400 Standard and BPI Certified; Compost in 2-5 months in a Commercial Composting System.

Fiber Plates, Bowls, Trays and Clamshells

- Made from plants, such as wheat straw, sugarcane, silver grass, or bamboo
- No wax or plastic lining
- Freezer safe
- Gluten free
- Oven safe up to 450°F for 45 minutes (lids are not microwave or oven safe)
- Conform to FDA guidelines for food use

TPLA (70% PLA and 30% Talc) Utensils

- Made from non-GMO cornstarch and talc
- Conform to FDA guidelines for food use

Paper Hot Cups & Bowls with Ingeo™ Lining

- Made from Forest Stewardship Council® paper
- Ingeo™ lining made from corn
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers, Straws, Lids

- Made from Ingeo™ compostable plastic, derived from corn grown in the USA
- Conform to FDA guidelines for food use

Trash, Produce and Yard Waste Bags

- Made from a mixture of synthetic and starch-based plastics
- Certified by TÜV AUSTRIA OK Compost Home
- Strong and durable
